***Allowable Subject Matter***

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a process for making a composition for conversion to lyocell fibers wherein an alkaline pulp comprising cellulose and at least about 7% hemicellulose is contacted under alkaline conditions with an oxidant to reduce the degree of polymerization to about 200-1100, whereby during the oxidation the hemicellulose content is not substantially reduced nor the copper number substantially increased.

Prior art processes result in compositions having substantially lower levels of hemicellulose. Reference is made to allowed co-pending application 09/975,598 which recites a process of making the fibers using the composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed January 17, 2006 have been fully considered and are persuasive. Accordingly, the rejections of claims under the judicially created doctrine of obviousness-type double patenting set forth previously have been withdrawn.
